Piano Lessons

Module 3

Section (iii)

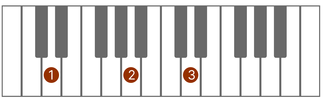
Content : 1. Left Hand
2. Arpeggios
3. Octive Position

Left Hand

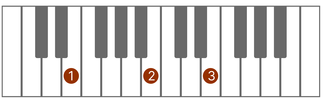
Left hand adds the weight of chords sound, it is usually played on the lower part of the piano / keyboard.

Do you remember the chords from one to six on their root position? Now in the left hand you omit the middle note and replace the first note with the similar note in the upper octive.

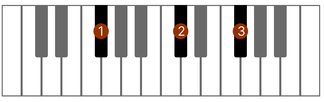
Chord 1.



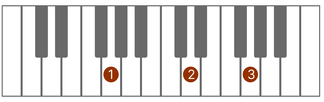
Chord 2.



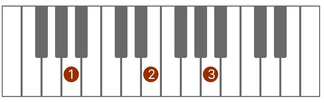
Chord 3.



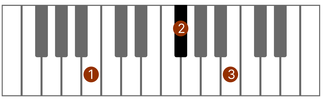
Chord 4.



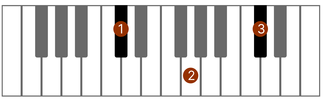
Chord 5.



Chord 6.



Chord 7 (Dim).



Now from this point always play the left hand with the same chord number as the right hand chord.

Arpeggios

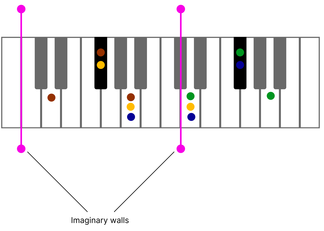
This is a rhythmic playing of notes up or down the keys as solo notes. Left hand usually uses arpeggios while playing instead of playing as chords. Play the notes one by one.

Octive Position

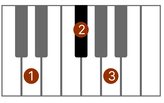
This is where all the chords are compressed to use one octive without changing the original sound of the chord.

Lets look at this example of chord 1, it has 4 inversions that some go beyond the octive with the pink boundary, now try to contain all the chords within the pink octive boundary.

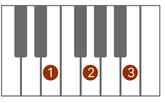
Chord 1.



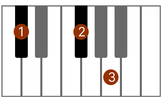
Chord 1



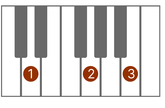
Chord 2



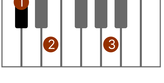
Chord 3



Chord 4



Chord 5



Chord 6

Congratulations

Now with all this, you are ready to play any song, practice left hand arpeggios with the chords of the same number on your right hand.

Sample songs

1. Through it all, i have learn to trust in Jesus (1,3,4,2,5,5)
2. Jesus, is the King of Kings (1,5,4,1,6)
3. Thank you / Gracias Senor (1,5,2,6,1,5,4,4)
4. Alpha and Omega / nasema asante (1,6,2,5,3,6,5)
5. Holy Holy are you Lord (1,3,4,2,5,5,1,...4,5,3,6,2,5,1)
